Management Software

POMeSYS Updates

Dear \${FNAME}Customer|Guest|\$,

TwinPeaks is dedicated to improving our software and rolling out updates to users as they become available. Below are some of the improvements and enhancements now available:

- When entering credit card or ACH payments, users will see a running total of what will be charged as they select invoices to be paid.
- Users can now add a message to the body of the email when emailing from Enter/Edit Orders or from Make After Delivery Adjustments.
- Users can now create bank accounts and assign payments to these accounts when entering payments. Users can then filter by these accounts on the Payments Received Register.
- The Production Spreadsheet can now be run without page breaks by customer or ship to and can now display the item short name.
- When closing orders, users can now choose from one route to another route.
- Users can now explode baskets on the Packing Report.

If you have any questions about these updates, please call 626-793-7223 or email info@twinpeaks.net.
