

## POMeSYS Updates

Dear \${FNAME}Customer|Guest|\$,

TwinPeaks is dedicated to improving our software and rolling out updates to users as they become available. Below are some of the improvements and enhancements now available:

- The Baker's Sheet report can now be grouped by Item Misc. Code with an automatic page break.
- The Special Prices List report now shows quantity levels.
- Users can now enter notes in the Vendor file.
- Users can now print the Item List report to show a list of items without an image. This will help identify which items do not contain an image for the dynamic catalog in Remote.
- Items added to the Sales Excluded Template will no longer print on the Driver's Sheet. To modify this list, please go to Settings > Item Settings > Item Templates > Sales Excluded item template (default template).
- Remote module can now be setup to warn customers when a minimum order amount has not been reached and not allow the user to save the order until more units have been added. To do so, minimum order amount must be added per customer. This feature must then be enabled in POM Remote Settings by choosing "Warning Only" option under Check for Minimum Order Amount.

If you have any questions about these updates, please call 626-793-7223 or email [info@twinpeaks.net](mailto:info@twinpeaks.net).
